

CAREER OPPORTUNITY WITH AN INDUSTRY LEADER

At K-Line, our core values of Safety, Quality, Integrity, Operational Excellence and Customer Satisfaction are the foundation of everything we do. As a premiere high voltage electrical contractor, our mission is to provide exceptional value to our utility and related partners through an unwavering commitment to these K-Line values. Proudly awarded Gold Standard as one of Canada's Best Managed Companies, K-Line continues its quest to be the premiere Canadian owned utilities solutions company. We currently have an opportunity available to be based out of **Stouffville, Ontario** for the position of:

CONSTRUCTION MANAGER—SUBSTATIONS AND PROJECTS

Overview

Working within our Substation and Projects Construction Division, this role will play a key part in the successful construction of high voltage substations with potential to include overhead and underground electrical construction projects. The successful candidate will be responsible for all the construction resourcing requirements of internal resources, subcontracted resources such as civil and low voltage constructors, site engineering and commissioning for both construction and maintenance projects. In addition, the Construction Manager will be responsible for assisting the Project Management Team to ensure all projects are completed on time, within budget, safely and with a high-quality standard to satisfy our client's requirements. This role will also be required to be a main contributor to our estimating team by providing productivity and cost inputs for all of our estimating activities.

Responsibilities

- Accountable for the guidance, direction, and planning competence for the execution of projects within the Substations and Projects Division
- Identify any issues requiring attention along with their urgency and overall impact of the project and work to resolve with Project Managers, Subcontractors and Foremen
- Identify any pending or actual changes to the work performed to the Project Managers that may impact cost, schedule, contract or customer relations
- Main point of contact for site-related issues
- Identifies, organize and commits resources (labour, tools and equipment) required for construction activities
- Provide expert judgement and input towards bidding process, client inquiries, safety matters, construction planning, subcontractor selection and quality management
- Ensure the utmost site safety including conducting regular site inspections and ensuring all findings are properly addressed

Experience & Education

- Post-secondary education in a related technical field
- Minimum ten (10) years' Construction Management Experience within the high voltage substation and overhead line industry is required
- Red Seal Certified trade certificate is an asset

Skills

- Strong management skills including understanding of project and program management
- Highly organized with the ability to multitask and work under tight deadlines
- Ability to interpret and resolve technical field issues
- Strong understanding of material and equipment used throughout the project including switchgears, transformers and cable systems
- Strong client interface
- Excellent communication skills
- Excellent computer skills including Microsoft Office Suite, Scheduling Software
