

CAREER OPPORTUNITY WITH AN INDUSTRY LEADER

At K-Line, our core values of Safety, Quality, Integrity, Operational Excellence and Customer Satisfaction are the foundation of everything we do. As a premiere high voltage electrical contractor, our mission is to provide exceptional value to our utility and related partners through an unwavering commitment to these K-Line values. Proudly awarded Gold Standard as one of Canada's Best Managed Companies, K-Line continues its quest to be the premiere Canadian owned utilities solutions company. We currently have an opportunity available to be based out of **Stouffville, Ontario** for the position of:

SITE SUPERVISOR/FOREMAN—SUBSTATIONS AND PROJECTS (IBEW Local Union 353 Position)

Overview

Working within our Substation and Projects Construction Division, this role will primarily supervise the construction of high voltage substations with potential to include overhead and underground electrical construction projects. The successful candidate will be responsible for overseeing all site activities including field supervision of internal resources, subcontracted resources such as civil and low voltage constructors, site engineering and commissioning for both construction and maintenance projects. In addition, the Substation Construction Supervisor will be responsible for assisting the Project Management Team to ensure all projects are completed on time, within budget, safely and with a high-quality standard to satisfy our client's requirements.

Responsibilities

- Reporting to a Project, Construction or Division Manager, provide leadership on various size projects, ranging from 5kV to 230kV
- Plan and execute construction of substations and associated sub-systems
- Direct and perform field assembly of all types of substation equipment including transformers, circuit breakers, high voltage switches, structural steel, aluminum buss, switchgear, control buildings etc.
- Direct and perform installation of overhead and underground electrical systems including underground cable (including splices and terminations), overhead linework (including all associated framing etc.)
- Oversee and supervise civil construction including general earthworks, concrete foundations, duct banks, ground grid installation, fence installation, landscaping and finishing works
- Mentor and supervise team members while developing good client relationships

- Mentor junior staff in the construction, erection, assembly and maintenance of all areas of substation construction
- Provide proactive leadership in order to develop a positive safety culture on the project site
- Liaise with other project team members to ensure all required materials, equipment and inspections support the project schedule, budget and stakeholder requirements
- Prepare permit applications for high voltage isolations and work protection
- Follow the company project management processes and methodology to maintain, update and complete reports, schedules, engineering drawing reviews/redlines, specifications, records and all other site documentation pertaining to the project
- Understand tools and associated equipment required to perform and execute substation construction

Experience & Education

- Red Seal Powerline Technician and/or Substation Electrician Certificate with post-secondary education in Powerline Technician or related field
- Minimum five (5) years' experience in a supervisory capacity within the high voltage industry
- Minimum ten (10) years high voltage substation/electrical construction experience (5kV – 230kV)
- Experience with construction of overhead and underground distribution systems
- Valid DZ Driver's License is an asset

Skills

- Strong computer skills including Microsoft Office Suite
- Knowledge of OHSA, the EUSA Rule Book, Utility Work Protection Code and other applicable regulatory safety requirements.
- Strong commitment to workplace safety.
- Blueprint and schematic reading skills.
- Exceptional problem-solving and collaboration skills
- Strong communication, customer service and leadership skills
- Willing to travel to project locations throughout Ontario.
