CAREER OPPORTUNITY WITH AN INDUSTRY LEADER

At K-Line, our core values of Safety, Quality, Integrity, Operational Excellence and Customer Satisfaction are the foundation of everything we do. As a premiere high voltage electrical contractor, our mission is to provide exceptional value to our utility and related partners through an unwavering commitment to these K-Line values. Proudly awarded Gold Standard as one of Canada’s Best Managed Companies, K-Line continues its quest to be the premiere Canadian owned utilities solutions company. We currently have an opportunity available to be based out of Lethbridge, Alberta for the position of:

CONSTRUCTION MANAGER—TRANSMISSION

Responsibilities

- Provide guidance, direction, and planning competence for the execution of projects within the transmission division
- Identify any issues requiring attention along with their urgency and overall impact of the project and work collaboratively with team members to resolve
- Identify any pending or actual changes to the work performed to the Project Managers that may impact costs, schedule, contract or customer relations
- Main point of contact for site-related issues
- Identify and commit resources (labour, tools and equipment) required for construction activities
- Provide expert judgement and input towards bidding process, client inquiries, safety matters, construction planning, and non-conformance reports
- Ensure the utmost site safety including conducting regular site inspections and ensuring all findings are properly addressed

Experience & Education

- Minimum ten (10) years’ experience within the high voltage Transmission industry is required
- Minimum five (5) year’s experience in a Construction Management and/or supervisory role
- Red Seal Journeyman Powerline Technician is an asset
- Post-secondary education in Powerline Technician, Project Management or a related technical field is an asset
Skills

• Strong management skills including understanding of project and program management
• Highly organized with the ability to multitask and work under tight deadlines
• Ability to interpret and resolve technical field issues
• Strong understanding of material and equipment used throughout the project including switchgears, transformers and cable systems
• Strong client interface with excellent communication skills
• Excellent computer skills including Microsoft office
